Alexandru **RUSOVICI**

Frontend Developer with a passion for minimalistic design

+40 747 089 434 | alex.rusovici@yahoo.com | LinkedIn Profile | GitHub Profile | Online Resume

Education

PixelLab – React Frontend Developer	August 2022 – February 2023
"Ion Mincu" University of Architecture of Urban Planning	October 2014 – July 2020

Projects

Monochrome
- Created an e-commerce website for a fictitious watch shop that has a responsive design and different layout designs for desktop and mobile versions.
- The main purpose of building this website was to learn the proper use of barrel files and create a proper style guide.
- Used Next.js to build the website, Netlify for CI/CD, and used Sass to style it.

Time app
- Created time-based applications in a website with a responsive design in which you can tell time, set a timer, and use a stopwatch.
- The main purpose of building this website was to learn how to add functionality to a website and how to manipulate the DOM using vanilla JavaScript.
- Used Next.js to build the website, Netlify for CI/CD, and used Sass to style it.

Additional projects:
- Thread affair – E-commerce website for a fictitious suits shop.
- Don Pablo Coffee Shop – E-commerce website for a faux coffee shop.

Work experience

VEGO – Architecture and urban planning firm

Lead Infrastructure and development department	January 2023 – February 2023

- Led a team of three to develop urban regeneration and infrastructure modernization projects.
- Had project management responsibilities that involved allocating resources, keeping in touch with clients and the municipality, managing external contractors, and helping with technical difficulties.

Architecture consultant – road infrastructure	November 2020 – February 2023

- Consulting the architecture department regarding how the vehicle and pedestrian infrastructure must be designed.
- Advocacy for Architecture projects in local committees that regarded road or pedestrian infrastructure.
- Mediating relationships between the architects, municipality, and clients regarding different infrastructure issues.

Urban planner	August 2018 – February 2023

- Analyzed the opportunity of constructing residential or commercial buildings on different plots in different cities.
- Designed urban design concepts for residential or commercial buildings.
- Elaborated plans and regulation documents for a plethora of different projects.
